

# Clear Color Expression of UHD Content

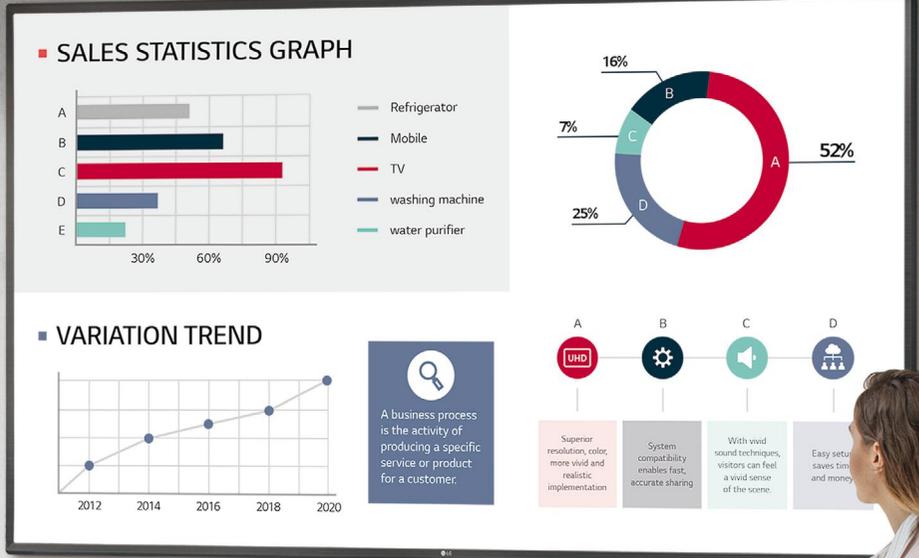

An Ultra HD large display, the UL3G series will improve business productivity in any location. All content is delivered in vivid colors and with fine details, giving audiences a clearer viewing experience. Moreover, equipped with wireless solutions and high compatibility features, the UL3G series makes operation promotions or meetings easier and more efficient.

 Superb Picture Quality

 webOS Smart Platform

 Meeting Room Solution

 Convenient Maintenance

\* All images are for illustrative purposes only.

### ULTRA HD Resolution

With the resolution that is 4 times higher than FHD, it makes the color and details of the contents more vivid and realistic. In addition, the wide viewing angle applied with LG IPS Panel, provides clear contents with no distortion.

### High Efficiency Video Coding

The UL3G series supports HEVC\* which efficiently compresses/ decompresses high-capacity UHD contents, playing ultra-high quality videos with half the network traffic than the existing H.264 codec.

H.264

HEVC

\* HEVC : High Efficiency Video Coding

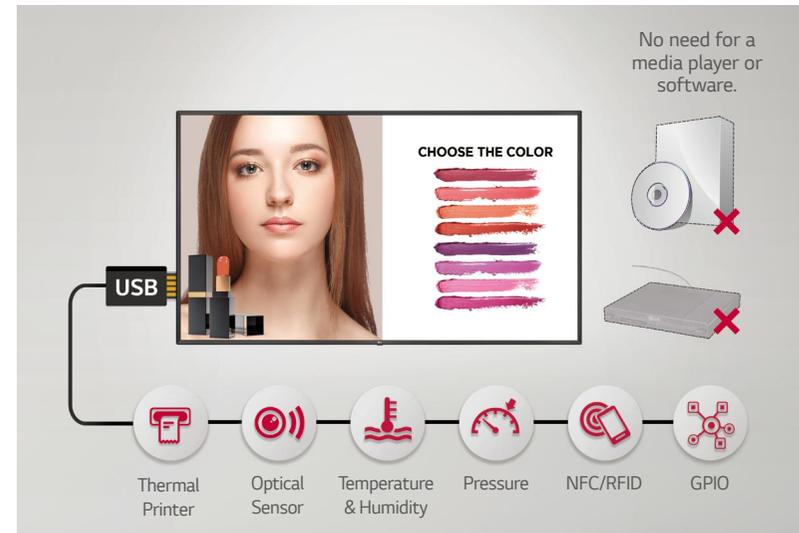

## High Performance SoC with webOS

Built-in Quad Core SoC can execute several tasks at once while providing smooth content playback without the need for a media player. Also, LG webOS smart signage platform enhances user convenience with intuitive GUI and simple app development tools.

## Various Sensor Applications

LG webOS smart signage platform easily supports connections with external sensors such as GPIO, NFC/RFID, temperature sensors, etc, via USB plug-in. The overall cost for maintenance is reduced as there's no need to purchase additional software or media players for creating value-added solutions.

## Content Sharing

Content Mirroring among devices is more convenient on a Wi-Fi network.

## Real-time Promotion

With Beacon and BLE (Bluetooth Low Energy), shop managers can provide coupons and information in real-time.

## Wireless Solution

The UL3G series operates as a virtual router which can be a wireless access point for mobile devices.

## Compatibility with AV Control System

The UL3G series has been certified Crestron Connected® for high compatibility with professional AV controls to achieve seamless integration and automated control\*, boosting business management efficiency.

\* Network based control

## Compatibility with Conferencing System

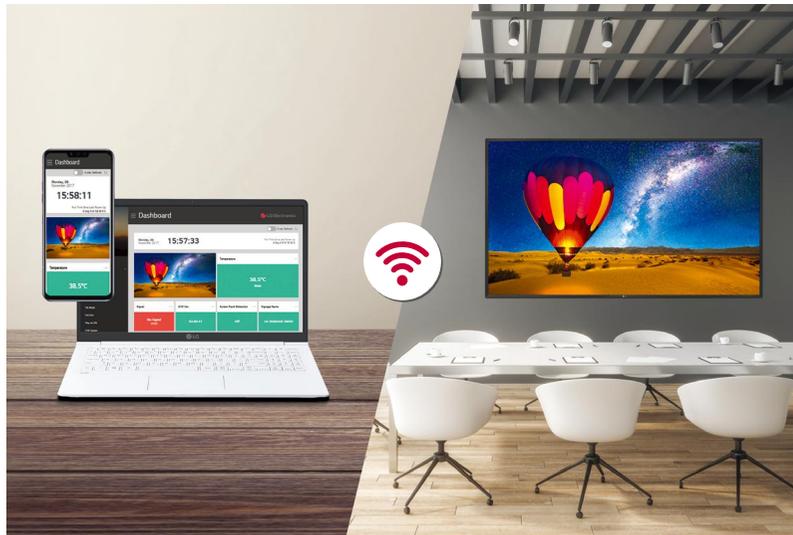

The certification of compatibility between the UL3G series and Cisco System that offers powerful and integrated control\* for video conference is in progress. It will promote the optimal visual meeting by eliminating a waste of time for setting up the picture quality or changing input on incoming calls.

\* Using an HDMI cable connection

### Remote Monitoring and Control

Through the Control Manager, the embedded web monitoring solution, you can control and monitor the status of multiple UL3G series displays in different locations in real-time. It is available on internet-connected devices, allowing you to flexibly and rapidly respond to emergency situations anywhere.

### Real-time Care Service with LG Signage365Care

The maintenance gets easier and faster with an optional service Signage365Care\*, a cloud service solution provided by LG service. It remotely manages status of displays in client workplaces for fault diagnosis and remote-control services, ensuring the stable operation of a client's business.

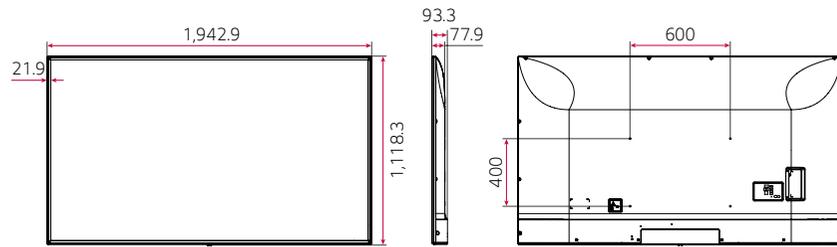

\* The availability of "Signage365Care" service can differ by region, so please contact the LG sales representative in your region for further details.
