

WD VelociRaptor™ SATA Hard Drives

Killer Speed
Rock-solid Reliability
5-year Limited Warranty

Ideal for performance enthusiast systems, workstations, and low-end servers.

The Fastest SATA Drive in the Known Universe.

Engineered for maximum speed! WD VelociRaptor, the newest member of our unique class of 10,000 RPM SATA hard drives, combines a SATA 3 Gb/s interface and 16 MB cache to deliver performance that's up to 35% faster than its speedy older brother, WD Raptor®.

- **Killer Speed** – Built on the performance bloodlines of WD Raptor, this 10,000 RPM drive delivers mind-bending performance. Not only is it 35% faster than the previous generation WD Raptor drives, but it also beat out all other competitors in the field.
- **Rock-solid Reliability** – Designed and manufactured to mission-critical enterprise-class standards to provide enterprise reliability in high duty cycle environments. With 1.4 million hours MTBF, this drive has the highest available reliability rating on a high capacity SATA drive.
- **Double the Capacity** – State-of-the-art technology packs twice the capacity per disk compared to its older brother WD Raptor resulting in 300 GB of high-performance storage space in this enterprise-class drive.

WD VelociRaptor SATA Hard Drives

Key Specifications

Interface:	SATA 3 Gb/s
Form factor:	2.5-inch (3.5-inch adapter)
Spin speed:	10,000 RPM
MTBF:	1.4 million hours
Limited warranty:	5-year

Compatibility

Windows® Vista/XP/2000

SATA interface connector on motherboard or SATA host controller

Available 3.5-inch internal drive bay

Compatibility may vary depending on user's hardware configuration and operating system.

Capacities

300 GB

Model Numbers

WD3000GLFS

Technology Features

IcePack™ Mounting Frame – The 2.5-inch WD VelociRaptor is enclosed in a 3.5-inch enterprise-class mounting frame with a built-in heat sink that keeps this powerful little drive extra cool when installed in a high-performance desktop chassis.

Rotary Acceleration Feed Forward (RAFF™) – Optimizes operation and performance when the drives are used in vibration-prone, multi-drive chassis.

SecurePark™ – Parks the recording heads off the disk surface during spin up, spin down and when the drive is off. This ensures the recording head never touches the disk surface resulting in improved long-term reliability and increased drive protection when the chassis is moved.
