

Konftel 300 and 200

conference telephones for all your meetings

Productive distance meetings require a conference telephone that is easy to use and delivers high sound quality. The models in the Konftel 300 series are very similar in appearance, and several essential features inside the telephones are identical. OmniSound® delivers HD-quality audio and useful features, like the conference guide, phone book and conference group storage to help get your meetings started. Furthermore, several of the models can connect calls from different connections or lines.

Another smart feature is recording to an SD card for meetings or dictation. Play, save or share your recordings later on. The Konftel 200 series is equipped with our OmniSound® audio technology, even if it has fewer other features overall.

Consider how you want to meet to find the model that is best for you. Landline or wireless, small or large meetings, smart features or scaled down. Regardless of which you choose, you will be very impressed by the outstanding sound quality.

FEATURES COMMON TO THE KONFTEL 300 SERIES:

- Multiple connectivity options: analog, SIP, computer and wireless DECT and mobile
- OmniSound® – superior sound quality with support for HD sound
- Conference guide helps you make multi-party calls and store conference groups
- Phone book stores contacts
- Menu and quick guide in multiple languages
- Record meetings to a memory card
- Two-year warranty

**OMNISOUND® – SUPERIOR SOUND QUALITY**

The patented OmniSound® audio technology guarantees that your distance meetings will have impressive, crystal clear sound in both directions, called **full duplex**. Hypersensitive microphones with 360° sound pickup and speakers provide powerful sound distribution to all participants.

OmniSound® delivers **HD sound** in calls over IP and the operator's mobile network. Also equipped with **automatic echo suppression** and **static reduction** which minimizes annoying background noise and an **equalizer** for personal adjustment of the sound quality.

Move freely around the room, talk, discuss and debate with retained sound quality that is entirely free from irritating sound clipping, damping or echoes. It's as close as you can get to natural sound.
